

Product Brief

BCA Inspect Pro

Accurate and consistent vehicle inspections.

BCA has been a leader in vehicle inspections for over 25 years supporting many of the UK's leading manufacturer, leasing and fleet operators. We have applied this insight and experience to create our new inspection product, BCA Inspect Pro, ensuring consistency, accuracy and transparency.

At the heart of BCA Inspect Pro is an application that captures high definition imagery, a video of the inspection, and that segregates within and out of standard damage. Our new product drives the vehicle inspection process, ensuring consistency and accuracy.

Once the inspection has been completed, the inspection results are presented to you via our new My Inspections website, ensuring transparency in the recording of the vehicle's condition. Easily configurable to your needs, BCA Inspect Pro provides an agile approach to the competitive demands of vehicle end of contract and remarketing activities.

Consistency

Our new inspection tool ensures that each vehicle is inspected in the same way, every time, and in line with your requirements - allowing comparisons to be made and giving certainty and peace of mind both in the service offered and in subsequent decision making

Accuracy

Using the latest technologies, BCA Inspect Pro geotags and time stamps all images that are taken, and provides the facility to take additional images of damage areas, which can then be annotated to highlight any damage or feature of interest.

Transparency

As the damage is recorded the system produces a cost for repair/replacement, providing your customer with an indication of the charges at the end of the process that they might be invoiced for and those items that they will not be charged for.

Flexibility

BCA Inspect Pro provides the flexibility to be able to work to any number of customer determined standards depending on your specific needs, including manufacturer specific standards or BVRLA guidelines. Management reports can also be provided, tailored to your needs to provide greater insight and visibility of the value of our inspection services to your vehicle remarketing performance.

Efficiency

The intuitive user interface and easy to use drop down boxes and imaging functionality makes it a quick and efficient way to complete a vehicle inspection, minimising any disruption to your customer's day.

Benefits summary

Intuitive and easy to use

Simple user interface means it is easy and straightforward to use, eliminating errors and reducing the length of the inspection time.

Flexible and configurable

The App can be easily configured to your chosen standards and processes. You decide what is acceptable wear and tear, and what is chargeable and BCA Inspect Pro is configured accordingly, ensuring consistency across vehicle inspections.

Scalable and repeatable

Every vehicle is inspected using a similar process, the same bench marks and measures, so you get an accurate and consistent inspection every time.

Transparent and open

The App makes the inspection process transparent and auditable with a clear record of the vehicle's condition, featuring any damage and associated costs – reducing end of contract customer complaints management and increasing claim recovery.

Comprehensive and auditable

The app delivers a full report of the vehicle's condition, any damage incurred, proposed repair methodology and associated costs – all backed up with high definition photography and video, your customers signature and comments.

Functionality

Comprehensive vehicle condition report

Details of within standards damage

Details of out of standards damage

Repair or replacement estimating

Customer configurable

Offline capability

Customer specific repair matrix

Consistent reporting of damage

Central data control to ensure all inspectors are using the same dataset

Geotagging of inspection data and images/video

NEW Video and HD images available via My Inspections

NEW Video and HD images available for your end customer to view via customer portal

NEW Video capture of reported damage (includes one month storage which is extendable)

NEW Image zoom functionality

NEW All damage recorded regardless of policy, automated validation subject to pre-agreed rules

NEW Near real time inspection results
